

Figure 1. Schematic representation of the 12 genes and their organization. The genes are arranged in a vertical column, with their names (12 genes) on the left and their corresponding gene structures (exons and introns) on the right. The gene structures are represented by boxes (exons) and lines (introns). The genes are: 1. *ATM*, 2. *ATR*, 3. *ATRIP*, 4. *ATRIP2*, 5. *ATRIP3*, 6. *ATRIP4*, 7. *ATRIP5*, 8. *ATRIP6*, 9. *ATRIP7*, 10. *ATRIP8*, 11. *ATRIP9*, 12. *ATRIP10*. The gene structures are shown for each gene, with exons represented by boxes and introns by lines. The genes are arranged in a vertical column, with their names on the left and their corresponding gene structures on the right.
